Task spec (YAML)

```
tools: read,check,draft,
notice, submit
confirmation_contract
rules (53 statute-linked)
llm_judge.checklist
```

Agent
calls tools
sends messages

multi-turn

Customer (sim)
holds private facts
confirms or rejects

Mediated-submit runtime

Mediated-submit (primary)
`masks submit()`
commits after confirm

Direct mode (ablation)
`submit()` exposed
to the agent

Append-only trace

```
draft -> disclose -> confirm -> submit
```

Final state
business DB

Hybrid grader

Rule layer
53 deterministic rules
r_rule

Trace judge (LLM)
semantic checklist
r_judge

r_process = r_rule AND r_judge
one process verdict per task run

Verdict

r_outcome = 1: final state matches

r_process = 0: trace breaks a rule

false-pass = (r_outcome=1) AND (r_process=0)

the right-answer, wrong-process gap
